

Idaho Fish Consumption Advisories

The Idaho Division of Health, Bureau of Community and Environmental Health developed the Idaho Fish Consumption Advisory Program (IFCAP) to help you safely choose, prepare and eat fish from Idaho waters. IFCAP tests fish from different bodies of water for pesticides, PCBs and heavy metals. A fish advisory does not mean you should stop eating fish from your favorite lake or river. It simply means you should monitor the amount of certain types of fish that you eat. For details visit our website at www.idahohealth.org or call us toll-free at 1-866-240-3553.

Legend

 - Bodies of water where fish consumption should be limited.
